- Part No. **TH-X381C**
- 2600 W (3 1/2 HP) induction motor
  - True helical cutterhead with 74 insert knives
  - Max. cutting width 381 mm

Instead of one full width blade striking the board, a true helical cutterhead features a series of smaller, four-sided solid carbide knives, wrapped around the cutterhead in a helical pattern. They carefully 'slice' their way through even the hardest of timber grain. Far quieter, far smoother finish than with a single blade.

400 mm Variable Speed Scroll  
Saw with Rotary Tool**

Part No. **SS-400H**

**SS-400H**

There's no better machine for making small or intricate projects, such as toys, puzzles, signs or ornaments, than a scroll saw! SS-400H features an integrated foot switch for hands-free switching and control. A flexible and detachable rotary tool is included to help add some personal touches to your work, sand, grind and even drill some small starter holes so you can experiment with pinhole and intricate scrolling.

A comprehensive selection of scroll saw blades is available. Please contact us or visit our website for further information.

**SS-530C**

This Carbatec scroll saw has been at the forefront of scroll saw technology for many years. Unlike other scroll saws, this machine has a tilting upper and lower arm instead of a tilting table. The operator can retain their natural stance for greater control, accuracy and safety.

## Cyclone Dust Extractors

The particles in a cyclonic swirl increase in velocity, creating higher CFM (Cubic Feet per Minute) and higher static pressure.

Larger and heavier particles slow down when meeting the crossbar and settle in the drum. Only the finer dust gets carried with the air stream up through the centre vane, through to the filter. All workshop air is returned filtered through the HEPA or 1 Micron canister.

**Why a dust-collector?**

A clean, dust-free work place is not only safer, but far less work in the long run. There is less clean-up and less airborne dust, which is very important when it comes to the finishing stage and your health. Carbatec offer many options in dust collection from small units designed for single machines to large units capable of connection to multiple machines.

**Woodturning** is having a massive resurgence in popularity. Your project can be started and completed in a day with only a few basic tools and a lathe, available in a variety of sizes and configurations.

**Mini Lathes** are usually designed to be light enough to be moved onto a workbench and stored away when not being used. When choosing your mini lathe, consider its 'swing-over' capacity, and the maximum length between the head and tail stocks. This will dictate the maximum length of your completed project. It's a great start on your journey to learn to turn, with models available for just a few hundred dollars.

**Midi lathes** offer some extra 'swing-over' capacity and extra power. They can also be a full featured, full-size lathe, with a modified and shortened bed, giving you a compact footprint but more versatile machine. It's a great upgrade up from a mini lathe, where your skills are growing, but your workshop space isn't.

**Full-sized lathes** are for many turners the first and the last lathe they ever buy. Where space permits, a full-sized lathe is just as capable at small, intricate project work as it is at creating a four-poster bed. The widest choice of features, drive types, power etc. Many have outboard turning capabilities, to allow turning pieces of a very large diameter. Higher power for great control and quicker work.

# RAMIA<sup>®</sup> WORKBENCH

Ramia workbenches beat building your own! They are faster, cost-effective, and come in a variety of options. Made with solid Birch wood, they are easy to assemble and boast beautiful finishes. Find them at Carbatec along with cabinets and accessories.

## RM-SCH-X

This 1200 mm square worktop is great for introducing students to woodworking. The timber-jawed, metal woodworking vices are robust enough for new woodworkers but won't damage their work. Sturdy timber legs provide a stable base for this workbench. Optional adjustable steel legs and locking storage cupboards are also available.
